

Haematology Department Box 234

Welcome to the Haematology Team

During your stay on the ward and when you become an outpatient, your care will be provided by the haematology team. You will meet members of the haematology team at these times. Haematologists look after blood and related disorders.

The team consists of different disciplines working together to look after you.

There are currently ten consultants in the team. One consultant, at a time, is in charge of the patients on the wards and this usually changes every month. You will meet him or her on the ward rounds on Mondays and Thursdays.

The consultants have their own areas of special interest and responsibility within haematology and following discharge from the ward you will be under the care of the appropriate consultant. You will be told of your consultant once your diagnosis is made.

You will meet members of the team during your stay on the wards and when you become an outpatient.

The Haematology Consultants and their areas of special interest are:

Dr Trevor Baglin	(Haemostasis and thrombosis)
Dr David Perry	(Haemostasis and thrombosis)
Dr Jenny Craig	(Acute Leukaemia and paraproteinaemias)
Dr Charles Crawley	(Blood & Marrow Stem Cell Transplantation)
Professor Tony Green	(Myeloproliferative Disorders)
Dr Robert Marcus	(Lymphoma and Chronic lymphoproliferative disorders)
Professor Alan Warren	(Myelodysplasia and Aplastic Anaemia)
Dr George Follows	(Chronic lymphoproliferative disorders)
Dr Dora Foukaneli	(Blood Transfusion, Myelodysplasia and Aplastic Anaemia)
Dr Brian Huntly	(Chronic Myeloid Leukaemia)

A team of specialist haematology registrars rotate throughout the wards, outpatients department and laboratories to support the consultants.

Whilst an in patient you will meet these doctors on their daily ward rounds. Out of hours and at the weekends, there is a rota of haematology doctors on call.

The ward nursing team

The Ward Manager leads the Ward Team and the nurses are divided into two teams. You will be allocated a named nurse who co-ordinates your care and you will be

cared for by nurses from one team. As well as the nursing staff, you will meet other staff on the ward including the ward clerk, ward assistants, physiotherapists, dietician, and members of the Palliative care team.

Haematology Day Unit (E10)

Once you are discharged from the ward you may need to attend the Haematology Day Unit to continue treatment or to monitor your blood counts. The Day Unit Coordinator is Sister Rosie Tween.

Haematology specialist nurses

You will be allocated a haematology specialist nurse, who will meet you both on the ward and when you attend the outpatients department.

The Haematology Specialist nurses are: -

Teresa Chapman	Bone Marrow Transplant Nurse Practitioner
Camilla Ward	Bone Marrow Transplant Nurse Practitioner
Phyllis Paterson	Myeloproliferative Specialist Nurse
Linda Gidman	Acute Leukaemia and Myeloma Specialist nurse
Gwyn Stafford	Lymphoma Specialist Nurse.
Kingsley Lawrence	Haemophilia Specialist Nurse
Emma Hayman	Haemophilia Specialist Nurse

You will find contact telephone numbers for your specialist nurse in your information pack. The specialist nurse will assist you with any questions about your diagnosis and treatment, co-ordinate your care and provide telephone advice when you are at home.

Haematology clinical trials team

We may invite you to take part in one of the many clinical trials running in our unit. The trials are co-ordinated by a team of nurses and data managers. You may meet members of the trials team if you agree to participate.

Outpatients

When you attend for follow up in the out patients clinic or the Haematology Day Unit, you will see either a consultant or a haematology registrar. You may not see the same doctor at each clinic visit but they are all part of the haematology team. You will also see your specialist nurse in outpatients.

Shared Care Arrangements

If you live far away from Addenbrooke's and have a District General Hospital nearer to you, it may be possible for you to attend there for treatment, such as blood/platelet transfusions or monitoring blood counts. We work very closely with local hospitals to ensure continuity in your care.
